CLIENT ENGAGEMENT

Over the course of a year we have engaged with clients through face-face and phone interviews and usability tests, and also through pointed web surveys on mobile, CMS, and general IR best practices.

Highlights:

Over **50 different Clients** have given us input

Over **100,000 words** from transcript client interviews

Broad sample **Sector, Agency, Market Cap, Europe, Asia**

Readily Consumable Estimates Analysis-

“One of the most important things” Haley does is stay on top of analyst research reports and First Call estimates. Since these recommendations move the street, Haley needs to know how they differ from guidance and why.

PROBLEM:

You never want to be caught off-guard on a below the line beat that isn't clean. You never want to say yeah, we beat the **street** by 2 cents, and then everyone says 'yeah, well you did it on taxes but operating cost didn't look great'. You always want to be aware of where you're meeting and not meeting the street expectation.

...if we know certain analysts are off in a certain profile in their P&L where we need to guide them better, its kind of like a nice guidance reference summary to know who we need to guide. Hey btw we noted you projected x, keep in mind we projected xyz...

Readily Consumable Estimates Analysis-

“One of the most important things” Haley does is stay on top of analyst research reports and First Call estimates. Since these recommendations move the street, Haley needs to know how they differ from guidance and why.

FUTURE STATE:

Estimates affords our users a comprehensive view into how analysts have rated their company or firms of interest based on a multitude of numerical measures. It will evolve from a segmented library of information into a well-integrated, cross-referenced, and trustworthy index of both historical and current estimate data.

2

Ownership look-throughs

Haley must maintain an updated understanding of major holders of her company's stock. This needs to be readily accessible for impromptu questions and must be organized into presentations for upcoming conferences/meetings.

PROBLEM:

Everyone wants it ASAP, but they also want it correct. So you have to find that balance of being able to produce these quickly

To be able to filter on those firms as we go through the process of identifying the trip and who we're going to see, really create that kind of a report and I know there is reporting in T-ONE right now, but we've kind of found it's sometimes easier just to download into Excel and then format a report on our own.

NASDAQ-Next Gen IR

2

Ownership look-throughs

Haley must maintain an updated understanding of major holders of her company's stock. This needs to be readily accessible for impromptu questions and must be organized into presentations for upcoming conferences/meetings.

FUTURE STATE:

“the thing I would expect to see first is probably my top holders, which seems like that's what I've got. And the things that are important to me on my top holders are probably who they are, where they're at, what their current ownership is and then the equity assets as well. I think historically, yes, you've got the fully weighted position below as well.. So that's kind of what I would immediately just want to see.”

The screenshot displays the 'IR Intelligence' interface. The top navigation bar includes 'Calendar', 'Estimates', 'Research', 'Contacts', and 'Firms'. The main content area is titled 'Firms' and shows a table with the following data:

Firm	Equity Assets (\$MM)	Investment Style
ING Investment Management Co. LLC New York Rahul Jadhav	\$40,047	GROWTH
TIAA-CREF New York Eugenia Parissi	\$222,634	GROWTH
Evercore Trust Company, N.A. New York William N. Glasgow	\$26,747	GROWTH
Cooke & Bieler, L.P. Philadelphia Richard James O'Neil	\$4,212	GROWTH
Charles Schwab Investment Management, Inc. San Francisco Marie A. Chandoha	\$50,914	GROWTH
Invesco Advisers, Inc. Atlanta Travis A. Williams	\$151,552	GROWTH
PPM America, Inc. Chicago Samuel A. Yee	\$5,703	GROWTH
California Public Employees' Retirement Sys... Sacramento Richard Duffy	\$60,766	GROWTH

An 'Open Saved Search' modal is open on the left, showing a list of saved searches under the 'Ownership Reports' tab. The list includes: 'Top Investor Opportunities', 'At Risk Holders', 'Underweight', 'New Holder', 'Rotating Investors', 'Top x Shareholder', 'Long Term Investor', and 'Event Activity'. The 'At Risk Holders' search is currently selected.

3

Allocate Execs time

I need to create complex, multi-day itineraries with multiple meetings and multiple contacts that meet the goals I set. I will send my executives in prepared with info about their meeting participants.

PROBLEM:

... if its been a recent meeting we use that to allocate our meetings, not so much with IR meetings but especially management requests, we get those a lot, and in order to maximize the best use of their time we need to allocate those meetings evenly and fairly among the buy-siders that make that request

I start contacting analysts through email mostly, sometimes phone calls to see, find out when next year's conferences are, any events they'd like us to participate in.

NASDAQ-Next Gen IR

3

Allocate Execs time

I need to create complex, multi-day itineraries with multiple meetings and multiple contacts. I would like to send my executives prepared with information about their meeting participants.

CURRENT WORK FLOW:

Sets Goals

Manages requests- decides which conferences should they attend and road shows they should go on and who they should meet with starting from sell-side list, as well as requests from people coming to town, and their own buy-side goals.

Negotiates back and forth with CEO/CFO and sell-side on who gets what meetings .

Prepares briefing materials of who they are meeting with

3

Allocate Execs time

I need to create complex, multi-day itineraries with multiple meetings and multiple contacts that meet the goals I set. I will send my executives in prepared with info about their meeting participants.

FUTURE STATE: Users will have the ability to quickly add and optimize interactions, manage relationships with key contacts, and analyze the efficacy of their IR schedule and strategy.

The screenshot displays the IR Intelligence software interface. At the top, there is a navigation bar with tabs for Calendar, Estimates, Research, Contacts, and Firms. The main view is a calendar for April 28 to May 2, 2014, showing a 'Google Cal Example' on Monday and a 'Q1 Breaking News Webcast' on Tuesday. To the right, a vertical list of events is shown for April 21, 24, and 25, 2014, including 'Check in with Rebecca', 'Investor Meeting', 'Quarterly Call with John at JP Morgan', and 'Analyst Dinner'. Below the calendar, a contact profile for Mr. David Bagnani is displayed, showing his role as Portfolio Manager at Fidelity Management & Research, his equity assets of \$892,009, and a 54% moderate turn over. The profile also lists his industries, countries, and regions. To the left of the profile, there is a section for 'Upcoming Interactions' and 'Past Interactions' with dates and times. At the bottom, there are icons for notes, a pencil, and a trash can.

4

Efficiently Manage Calendar-

With so many of moving parts Rebecca scrambles to keep everything up to date and accurate

PROBLEM:

Right now I am doing everything in duplicates, actually in triplicates because I also have an excel calendar and one in Outlook

...because it's so tedious, I do it at the end of every quarter I go to CMS calendar and then just update that calendar, because it's so time consuming.

NASDAQ-Next Gen IR

4

Efficiently Manage Calendar-

With so many of moving parts Rebecca scrambles to keep everything up to date and accurate

CURRENT WORK FLOW:

5

Easily Identify New Actionable Information-

Rather than having to look through and analyze what's if anything has changed that requires her attention, Haley needs a starting point that has that information together in an actionable format.

PROBLEM:

as far as I'm in Thomson One from 8:30 in morning all day long, I use it to keep on top of First Call quarterly notes certainly for the retail industry.

Those are very useful things so if you can get that stuff in a glance as opposed to having to mine for it...

NASDAQ-Next Gen IR

5

Easily Identify New Actionable Information-

Rather than having to look through and analyze what's if anything has changed that requires her attention, Haley needs a starting point that has that information together in an actionable format.

CURRENT WORK FLOW:

Checks in throughout day -monitoring.

Copies and pastes into worksheet to identify changes in the data

6

Collectively put together the story of the quarter for earnings prep-

Ben is required to manage all aspects of Investor Relations throughout the quarter. This includes keeping up on investor activity, reaching out to analysts, and mining peer transcripts for Q&A.

PROBLEM:

Annamarie (Limited Brands): As you can see right away on a quarterly basis as our competitors report I have to pull transcripts from SE on their calls and I gather First Call notes and that helps our team to see what other people are saying as we get develop the script for our quarterly call. So that would be one of the things I do on a quarterly basis,

I'm just so terrified you're going to have a mistake and the information is going to get out ahead of time.

NASDAQ-Next Gen IR

6

Collectively put together the story of the quarter for earnings prep-

Ben is required to manage all aspects of Investor Relations leading to earnings. This includes keeping up on investor activity, reaching out to analysts, and mining peer transcripts for Q&A.

FUTURE STATE:

“It looks to me like this is what this sell-side analyst has said on Transcripts, which would be pretty nice for the reason that we put together questions for our clients to try and prepare them for questions they might get asked on calls, and to be able to see what particular analysts maybe that are on their calls all the time or are asking. **That would be a pretty good feature.**”

The screenshot displays the IR Intelligence software interface. The main window shows a list of reports with columns for Title, Date, Revisions, Tickers, and Author. A detailed view of a report titled "Under Armour Posts Solid Quarterly Results: Gives Cautious Outlook" is shown on the right. The report includes a "View report" button, a "Read later" button, and an "Initiation report" button. The author is identified as Ms. Rosie J Edwards from Goldman Sachs International. The interface also shows a sidebar with "My Company Reports" for 200/653, a "Date Range" filter set to "Last 30 days", and a "Tickers" section with filters for NDAQ, GSK-LN, and Tech (3). The bottom of the interface shows a navigation bar with "Reports" and a status bar with the URL "prototypes.prodado.mx/IR-Desktop/build/research/".
